

Autism and Tertiary Behavior Supports
www.ksdetasn.org

Before Requesting Assistance:

Check to see if there are local resources to address the concern, if you are not sure what resources are in your area, call (913) 588-5943 and ask!

What is the process for request consulting?

All requests for technical assistance and training are handled through the TASN website. Go to www.ksdetasn.org and click the big "Request Assistance" Button

Once the Autism and Tertiary Behavior Supports Project receives the request we will ask that you identify no more than two areas of concern and provide the following records (if available) prior to scheduling the consultation:

- Signed Release of Information
- Copy of the most recent IEP
- Copy of the most recent re-evaluation results
- Copy of the Functional Behavior Assessment and Behavior Intervention Plan
- Copy of the Transition Planning Assessment and the plan developed from the assessment, where applicable
- Copy of the student's daily schedule
- Any independent educational reports
- Recent behavior data summary
- Diagnostic Information

In addition, please be aware that we ask that the student's parents/guardians be invited to attend the meeting following our observation. During the meeting an action plan will be developed by the team to address the concerns identified in the request for consultation.
